For the second deliverable

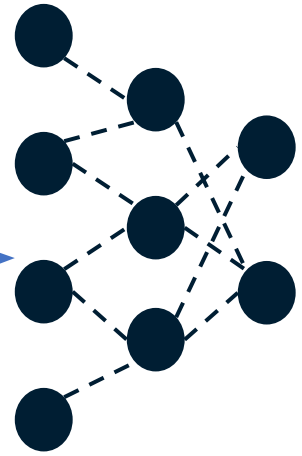
DO NOT use red color in the slides

Sick-Cattle Images

Healthy-Cattle Images

Convolutional Neural Network

Classification Algorithm



Classification Model

Perhaps you do not need to change anything in this slide

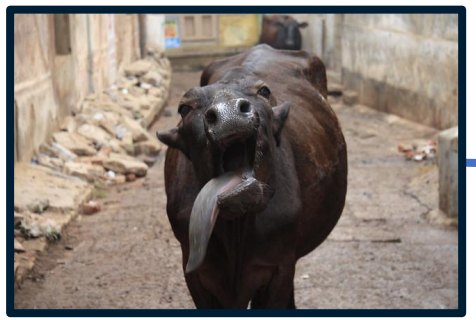
UNIVERSIDAD EAFIT

Testing Process

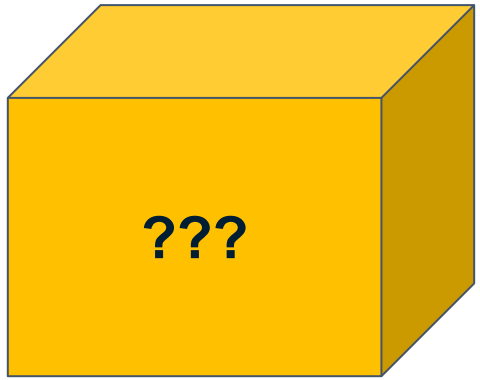
Keep this title

Complete this slide For the second deliverable

DO NOT use red color in the slides

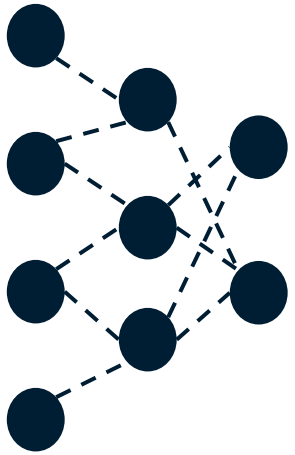


Cattle Image



??? Compression Algorithm

Please, include the name of your compression algorithms here



Classification Model

Output

Keep this title

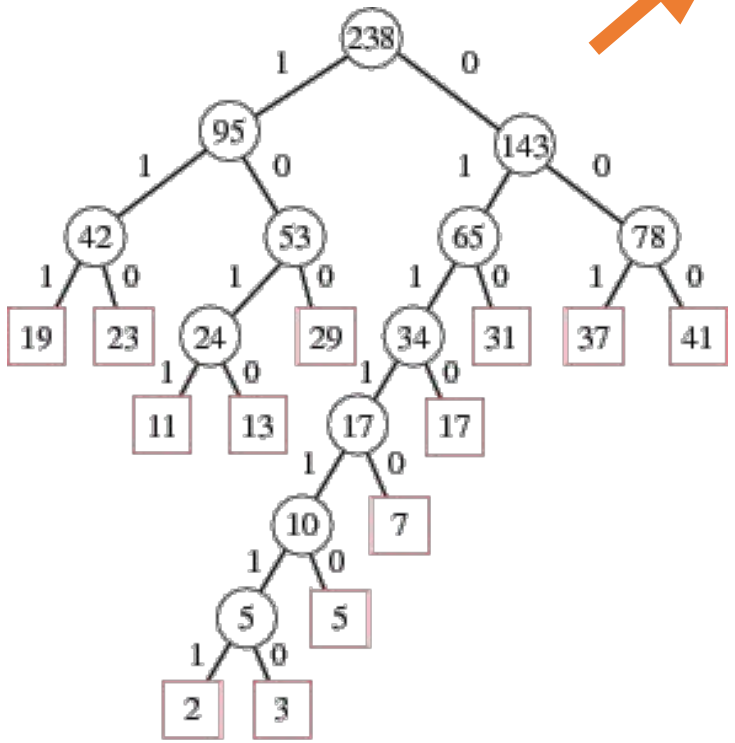
Compression Algorithm Design

Complete this slide For the second deliverable

DO NOT use red color in the slides

Use vectorized figures to explain the algorithm you designed, so They are not pixelated like mine

Use these Colors for Your figures



Include a HD picture related to the problem of animal health in precision livestock farming

Image compression algorithm for animal-health automatic classification (*In this semester, one could be LZS, Huffman, LZ77, LZ78… please choose*).

Explain the figures in your own words

UNIVERSIDAD EAFIT

Compression Algorithm Design

Complete this slide
For the second
deliverable

DO NOT use red color
in the slides

Use vectorized figures to
explain the algorithm you designed, so
They are not pixelated like mine

Use these
Colors for
Your figures

Encode (i.e., compress) the string **ABBCBCABABCAABCAAB** using the LZ78 algorithm.

	Dictionary	
output	index	string
(0, A)	1	A
(0, B)	2	B
(2, C)	3	BC
(3, A)	4	BCA
(2, A)	5	BA
(4, A)	6	BCAA
(6, B)	7	BCAAB

The compressed message is: **(0,A)(0,B)(2,C)(3,A)(2,A)(4,A)(6,B)**

Include a HD picture related to the
problem of animal health in
precision livestock farming

Explain the figures in your
own words

UNIVERSIDAD EAFIT

Keep this title

Complete this slide
For the third deliverable

Compression Algorithm Complexity

DO NOT use red color in the slides

Create the table in Powerpoint. Do not copy pixelated screenshots from the technical report please!

	Time Complexity	Memory Complexity
Image compression	$O(N^{2}*M*2^{M})$	$O(N*M*2^{M})$
Image decompression	O(N*M)	O(1)

Time and memory complexity of the (In this semester, one could be LZS, LZ77, LZ78, Huffman… please choose) algorithm. Please explain what do N and M mean in this problem. PLEASE DO IT!

Explain the tables in your own words

Use superindices to represent the exponents. DO NOT use the ^ symbol

Include a HD picture related to the problem of animal health in precision livestock farming

UNIVERSIDAD EAFIT

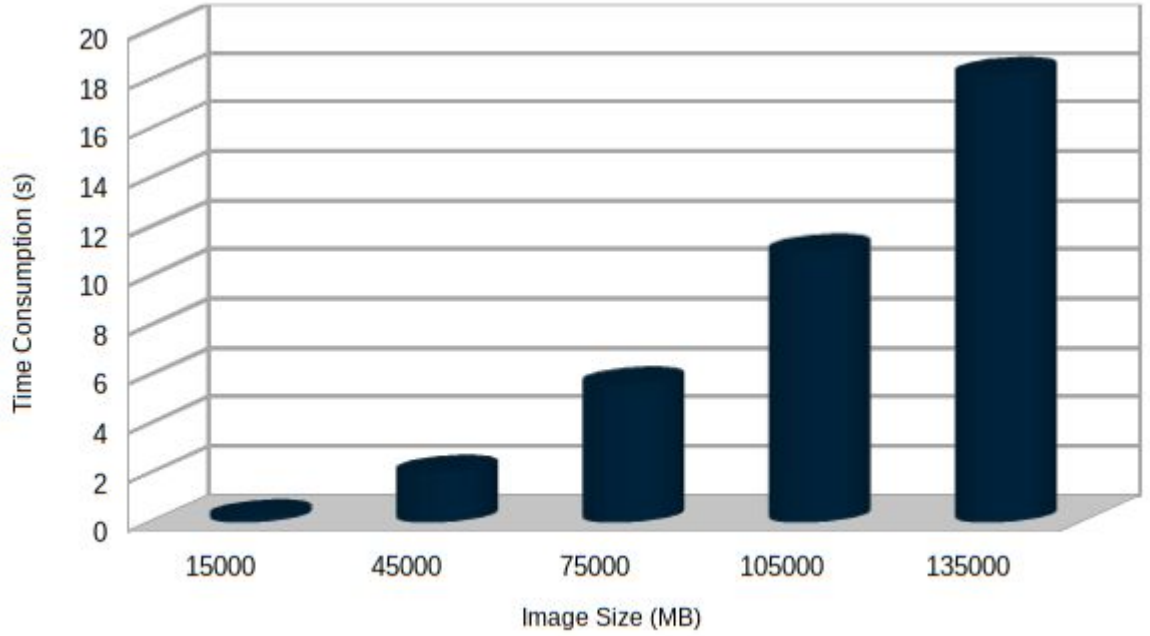
Time and Memory Consumption

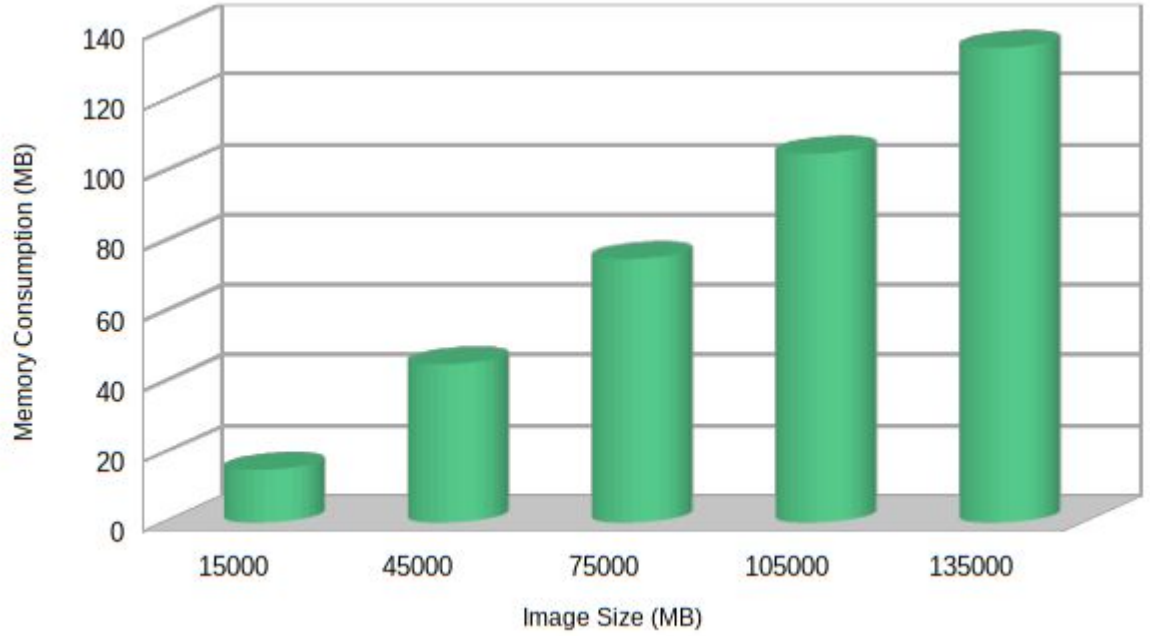
Keep this title

Complete this slide
For the third deliverable

DO NOT use red color in the slides

Create the plots in Excel. Do not copy pixelated screenshots from the technical report please!





Time Consumption

Memory Consumption

Please, include measurement units in both X axis and Y axis, for instance, MB, s, KB, minutes...

UNIVERSIDAD EAFIT

Keep this title

Complete this slide
For the third deliverable

Average Compression Ratio

DO NOT use red color in the slides

Create the table in Powerpoint. Do not copy pixelated screenshots from the technical report please!

	Compression Ratio
Healthy Cattle	100 : 1
Sick Cattle	98 : 1

Average compression ratio for Healthy Cattle and Sick Cattle.

Explain the tables in your own words

Include a HD picture related to the problem of animal health in precision livestock farming

UNIVERSIDAD EAFIT

Keep this title

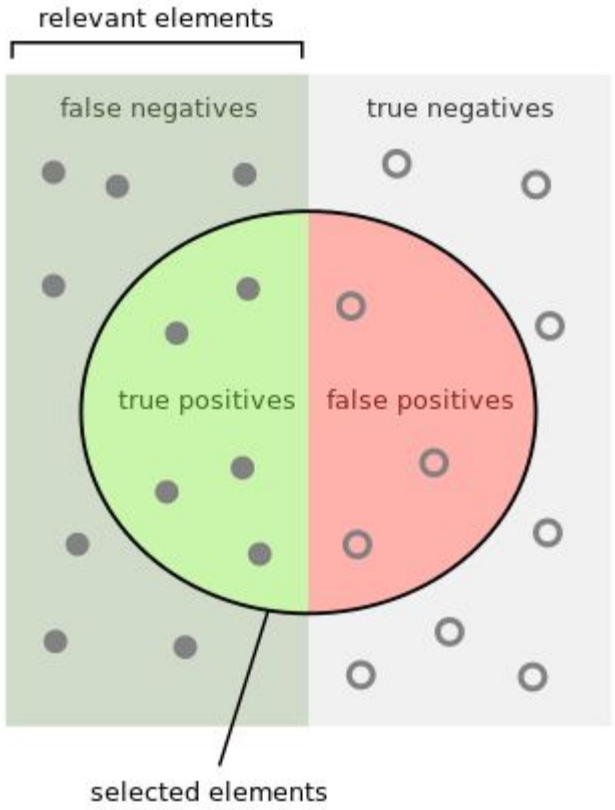
Complete this slide
For the third deliverable

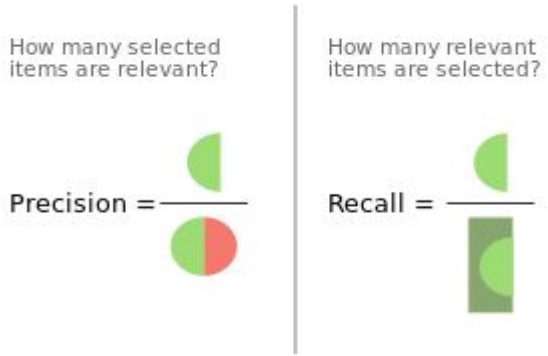
Classification Evaluation Metrics

DO NOT use red color in the slides

Use vectorized figures to explain the algorithm the evaluation metrics, so they are not pixelated like mines

Use these Colors for Your figures





Explain Accuracy too…

Create a graphical representation using the notation proposed in this slide

If possible, avoid equations for simple concepts that can be explained through diagrams

UNIVERSIDAD EAFIT

Complete this slide
For the third deliverable

Classification Evaluation Metrics

DO NOT use red color in the slides

Create the table in Powerpoint. Do not copy pixelated screenshots from the technical report please!

	Testing data set (original images)	Testing data set (compressed images)
Accuracy	0.3	0.2
Precision	0.25	0.21
Recall	0.12	0.11

Evaluation metrics using a testing dataset of ?? healthy cattle and ?? sick cattle images. Compressed images were obtained with ??? algorithm (Please, complete with your algorithm)

Include a HD picture related to the problem of animal health in precision livestock farming

Explain the tables in your own words

UNIVERSIDAD EAFIT

Report Accepted on arXiv

Keep this title

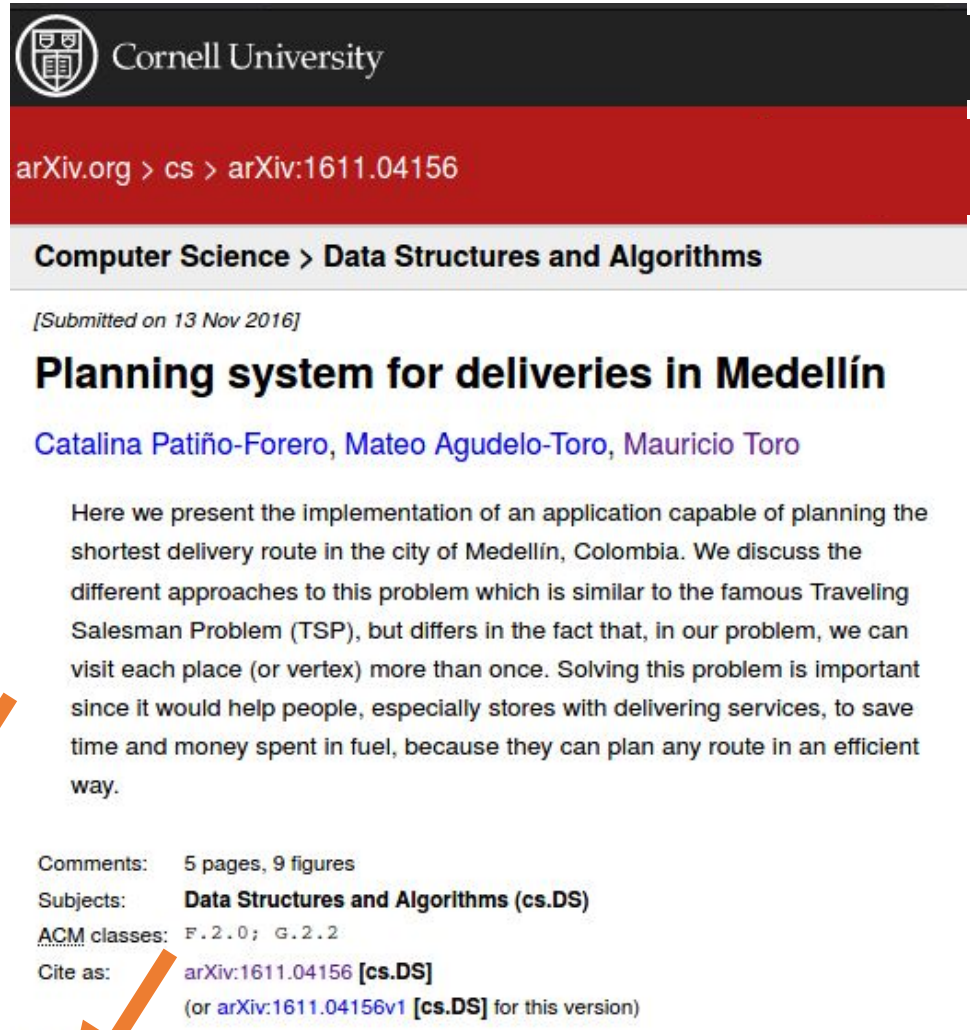
Complete this slide
For the third deliverable

DO NOT use red color in the slides

Include the citation of the report in arXiv and link. Alternatively, use OSF

C. Patiño-Forero, M. Agudelo-Toro, and M. Toro. Planning system for deliveries in Medellín. ArXiv e-prints, Nov. 2016. Available at: https://arxiv.org/abs/1611.04156

Include a screenshot



Include the teaching assistant and professor, please

UNIVERSIDAD EAFIT

DO NOT use red color in the slides

Please do not forget the acknowledgements to your scholarship (if you have one)

THANK YOU!

Supported by

The first two authors are supported by a Sapiencia grant financed by Medellín municipality. All the authors would like to thank the "Vicerrectoría de Descubrimiento y Creación", of Universidad EAFIT, for their support on this research
